ACADEMIC PROJECT

- **Automatic Room Light Controller With Visitor Counter :**
This project "Automatic Room Light Controller With Visitor Counter " is a reliable circuit that takes over the task of controlling the room lights as well as counting number of persons/visitors in the room very accurately. When somebody enters the room then the counter is incremented by one and the LED light in the room will be switched ON and anyone leaves the room then the counter is decremented by one. The light will be only switched OFF until all the persons in the room go out.
- **Future Scope**
By modifying this circuit and using two relays we can achieve a task of opening and closing the door
